

HAPPY HEALTHY HOMES

The impact of virtual intervention delivery to improve family child care home providers' nutrition practices, confidence, and knowledge.

6 OUT OF 10

preschool children in the U.S. spend significant time in family child care homes (FCCH).

PARTICIPANTS COMPLETED...

MINUTE INDIVIDUAL CLASS I

COACHING CALL

MINUTE INDIVIDUAL CLASS II

3-HOUR GROUP COOKING CLASS

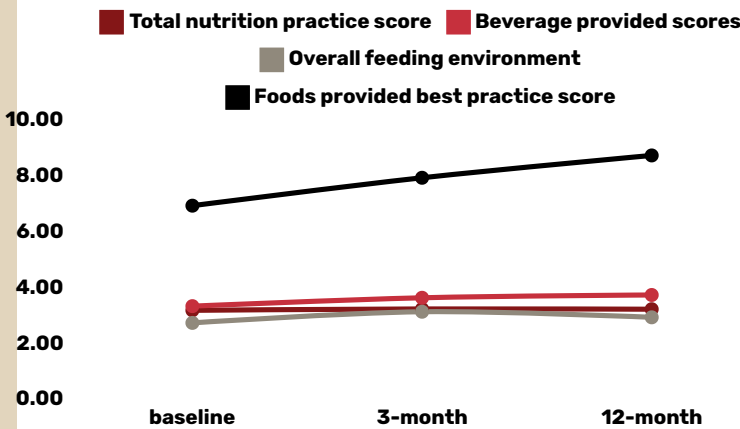

Nutrition group
15 providers

Non-nutrition group
21 providers

Provider race/ethnicity

Improvements in all aspects at 3 months

Changes did not sustain at 12 months

Nutrition confidence was high in both groups before the training.

Nutrition group increased at 3 months

Nutrition group did not sustain changes at 12 months

Providers reported fewer barriers before the training.

It remained unchanged at 3 and 12 months

Increased knowledge in serving whole grains

Increased knowledge in serving less fried foods

KEY TAKEAWAYS

There were some immediate positive changes observed in the quality of nutrition practices and environment after the virtual training.

More hands-on training and resources can be helpful in not only improving their immediate practices but also sustain those changes long-term.

The training was effective in sustaining some sustained nutrition practices at 12 months.
