FROM THE CHAIR OF THE DEPARTMENT OF REHABILITATION SCIENCES

Welcome to the beginning of your career as an occupational or physical therapist!

POLICIES

The policies provided in the Department of Rehabilitation Sciences Student Handbook will align with the relevant policies outlined in the College of Allied Health Student Handbook and the OUHSC Student Handbook.

MISSION STATEMENTS

OUHSC MISSION STATEMENT

The mission of the University of Oklahoma Health Sciences Center, as a comprehensive academic health center, is to educate students, residents, and other trainees in professional and graduate programs to become Oklahoma's future team of healthcare leaders, clinicians, researchers, and educators; to advance distinctive basic, translational, clinical, and population research; to innovate and commercialize discoveries; and to deliver exceptional patient care across the full breadth of adult, women's, and children's specialties.

COLLEGE OF ALLIED HEALTH VISION AND MISSION STATEMENT

The vision of the College of Allied Health is to be a leader in improving quality of life so people and communities thrive, and the mission of the College of Allied Health is to promote a culture that develops health professionals who enrich the lives of people and communities through interprofessional education, discovery, and care..

DEPARTMENT OF REHABILITATION SCIENCES MISSION STATEMENT

The mission of the Department of Rehabilitation Sciences (DRS) is to work collaboratively to optimize the abilities, performance, and participation of all through:

1. Engaging in interprofessional education as leaders who use best evidence to shape the healthcare environment.
2. Conducting, disseminating, and promoting visionary research and scholarly activities to advance the knowledge in the rehabilitation sciences and translate new knowledge into the best healthcare practices.
3. Advocating to advance policies, practices, and healthcare management to promote health in society.
4. Providing exceptional care to clients, clinicians, organizations, communities, and our University through our expertise in the rehabilitation sciences.

DEPARTMENT OF REHABILITATION SCIENCES HONOR STATEMENT

As future occupational therapists and physical therapists and as rehabilitation sciences faculty, we join in upholding the honor and integrity that define our noble professions. We dedicate ourselves to providing the best care to all people who seek our services and do so with a deep sense of responsibility and commitment to ongoing learning that is steeped in evidence-based decision making and excellence. We embrace the values of honesty, selflessness, compassion, respect, cooperation, reflection, and accountability. We will lead by example and strive to express the values of our professions in our daily behavior, whether we are in the classroom, the clinic, or elsewhere. In this spirit of honor and integrity, we will hold ourselves, our peers, and our future colleagues to the highest of standards.

OVERVIEW OF PROGRAMS

Learning in classrooms, laboratories, and other venues provides a strong foundation for learning in practice settings. Students' experiences in our classrooms and laboratories incorporate methods including, but not limited to, traditional faculty-led presentations and examinations, interprofessional tutorial/case-based problem solving facilitated by faculty members, simulations, and independent study through virtual learning opportunities.

COURSES AND INSTRUCTION

The courses of the professional programs in occupational therapy and physical therapy are offered through the Department of Rehabilitation Sciences and the Department of Allied Health Sciences. Each course has a course coordinator who is responsible for the design of the course, the syllabus and schedule, evaluation of student performance, and overall course management.

Our curriculum includes course work, lab work, clinical rotations/fieldwork, lectureships, and professional development activities. Faculty present lectures on either the Oklahoma City or the Tulsa campus and broadcast live to the distant campus via technology in real time. Resident faculty and adjunct instructors present laboratory classes live on each campus. Tutorials and seminars are offered in both live and broadcast formats.

All didactic and skill-based examinations occur on each campus with faculty proctors and are not broadcast. Students use the microphones on their classroom tables to communicate with students and faculty in the remote classrooms. The speaker and on-site audience can always see the actions of the remote audience, even when its microphones are inactive.

Students receive dates/times for scheduled examinations, classes, and lab sessions as early as is feasible, but this information may not be available before the start of the semester.

The length of the course lectures and labs may vary from the traditional 50-minute session and some courses include laboratory sections. Students receive a course schedule at the start of each semester. Sometimes lectures and/or labs must be rescheduled with little notice, so students must avoid scheduling work or other activities between the hours of 8-5pm on Monday through Friday.

Occupational Therapy Curriculum

The Occupational Therapy curriculum consists of 99 credit hours.

Physical Therapy Curriculum

The Physical Therapy curriculum consists of 108 required credit hours.

FIELDWORK (OT) AND CLINICAL EDUCATION (PT)

Student therapists must safely and effectively apply skills, knowledge, and behaviors that they have learned in the classroom, labs, and community to prepare them to care for people in the settings in which therapists practice. For this reason, students in the Department of Rehabilitation Sciences participate in a variety of practice settings during their course of study. The occupational therapy program refers to these experiences as "fieldwork." The physical therapy program refers to the experiences as "clinical education." Fieldwork and clinical education occur as separate courses. For more information regarding fieldwork and clinical education, please see the [Fieldwork & Clinical Education section](#).

INTERCAMPUS TRAVEL

Students should plan to travel at least 3-4 times in a semester between campuses or to other places for clinical rotations/fieldwork, community, and special learning experiences that cannot be offered simultaneously on both campuses. Students must plan for the financial and logistical resources required for transportation and possibly lodging as well as for the additional time demands necessary to take full advantage of these opportunities. As possible, students coming from the Tulsa campus are provided with parking discount vouchers to use in OKC. Currently, parking in Tulsa is free.

POLICIES AND PROCEDURES

This Handbook accompanies the [OUHSC Student Handbook](#) and the [Allied Health Student Handbook](#) and is not intended as an exclusive reference manual for all University policies and procedures. The information contained in this Handbook is current only at the time of publication and may change from time to time by action of appropriate segments of the institution. Every effort is made to ensure that the policies published in the Student Handbook are updated as necessary. However, it is the responsibility of the user to determine that they are relying on the most current version of any policy. Questions concerning policies should be directed to the Department Chairman or the Office of Academic and Student Affairs.

HONOR CODE RELATED POLICIES

Adherence to the departmental honor code (on page 5) is an important part of the expectations for both programs. The following process should be followed if an honor code violation is suspected or observed:

1. When possible, students should discuss the apparent infraction directly with the person or group who appears to have committed it. This face-to-face interaction may resolve the issue and may warrant no further action. If students fear that untoward retribution or other negative consequences may result from such a discussion, they may decide that this approach is not their best option.
2. If the student chooses not to exercise option #1, and if the apparent infraction is associated with a particular course, students should inform the course coordinator, or a faculty member associated with the course (who will then notify the course coordinator). If the issue is not associated with a course, the students should notify the occupational therapy or physical therapy program director.
3. The course coordinator or program director who receives the report of the infraction will gather information. If an infraction has occurred, they will meet with the student(s) involved. The course coordinator or program director may choose to involve the student's faculty advisor or another faculty member in the meeting.
4. Depending on the type of infraction, the instructor or program director may be capable of resolving it at the course/department level. If the infraction is one of academic misconduct, the course coordinator or program director will follow Academic Misconduct Policy found in the [Faculty Handbook](#) in Appendix C.

Students are bound by the Department of Rehabilitation Sciences Honor Statement in all situations during their course of study at OUHSC and they must hold themselves and their peers to its standards. If students identify an instance in which they believe someone has violated one or more aspects of the honor statement, they have the responsibility to report it. Students who are aware of a violation but who do not address it have themselves committed an act that is in opposition to the Department of Rehabilitation Sciences honor statement.

STUDENT HEALTH AND WELL-BEING

TECHNICAL STANDARDS

BACKGROUND

Pursuant to University of Oklahoma Health Sciences Center (OUHSC), the Professional Programs in Occupational Therapy (OT) and Physical Therapy (PT) at OUHSC welcomes all qualified OT and PT applicants regardless of age, gender, heritage, ethnicity, race, religion, or disability. The Professional Programs in PT and OT follow Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, including changes made by the Americans with Disabilities Amendments Act of 2008.

Our programs are committed to graduating high quality OTs and PTs who are safe and proficient practitioners. The training of students for the complexities of clinical OT and PT practice requires a variety of skills and aptitudes; cognitive, physical, and social emotional.

Technical Standards are the academic, clinical, and interpersonal aptitudes and abilities that allow OT and PT students to complete the professional curriculum. Technical Standards apply in the classroom, tutorial, laboratory, and fieldwork and clinical settings. Students may meet the requirements of Technical Standards with or without reasonable accommodations.

APPLICATION OF TECHNICAL STANDARDS

The Professional Programs in OT and PT at OUHSC select applicants based on attributes and accomplishments portraying the candidate as highly likely to succeed in the academic and clinical coursework and in the profession. OUHSC must ensure that patients/clients are not placed in jeopardy by students with impaired intellectual, physical, or emotional functions.

In accordance with the accreditation standards of each profession, the OT and PT programs have the prerogative and ultimate responsibility for selection and evaluation of its students, the design, implementation, and evaluation of its curriculum, and the determination of who is eligible to be awarded a degree.

Admission and retention decisions made by the faculty are based on academic achievement as well as non-academic factors. Students are evaluated to ensure that they can successfully perform the Technical Standards of the academic program required for graduation.

An offer of admission may be withdrawn and/or a student may be recommended for dismissal from the program if:

- after a student has requested and received a reasonable accommodation, they are unable to meet program qualifications including these Technical Standards.
- it becomes apparent that the student cannot meet the Technical Standards even with reasonable accommodation.
- the requested accommodation(s) would fundamentally alter the nature of the Programs in OT or PT at OUHSC, or
- the requested accommodation(s) would create a significant risk of harm to the health or safety of others.

TECHNICAL STANDARDS

The faculty in the OT and PT Programs at OUHSC identifies the following Technical Standards as fundamental to the curriculum and profession of OT and PT. Students must be able to perform these Technical Standards during classroom, laboratory, and experiential learning activities (including but not

limited to participation in one-on-one interactions, small group discussions and presentations, large-group lectures, and patient encounters) in the academic, fieldwork, and clinical settings.

COGNITIVE ABILITIES

- Gather, critique, and apply relevant professional literature to clinical situations.
- Identify and solve problems in a timely manner.
- Organize and prioritize multiple tasks (projects/assignments, clinical activities)
- Attend to task completion.
- Exercise good judgment and adhere to all safety precautions during lecture, lab, and clinical experiences.
- Maintain confidentiality of client/patient information.
- Apply academic learning to clinical situations.
- Recall and retain information.
- Interpret, integrate, and analyze information (assessment data, context, OT performance, environment).
- Acknowledge limitations and obtain appropriate assistance to provide safe client care.
- Mathematic ability to understand, calculate, and interpret basic statistics tests and measures.

PHYSICAL ABILITIES AND SKILLS

MOTOR

- OT and PT students must possess a variety of gross and fine motor skills. These skills are reflective of the physical capacities required to perform the job of an OT therapist or physical therapist in a wide variety of settings. Students must be able to:
- Maintain and assume a variety of positions including sitting and standing for up to 3 hours continuously, frequent walking, bending, squatting, kneeling, stair climbing, reaching forward, reaching overhead, turning and movement of the trunk and neck in all directions.
- Perform manual material handling and manipulation of various sizes and weights including lifting and transferring patients, guarding patients during functional mobility training on level surfaces/uneven surfaces/ramps/stairs to assist with balance, pushing and pulling to provide resistance and to assist in maneuvering patients.
- Specific requirements include:
 - Safely lift up to 35 lbs. independently when transferring and or performing manual patient handling or when handling patient care related materials.
 - Safely push and pull up to 100 lbs.
- Demonstrate adequate bilateral grasp during patient care activities, bilateral gross and fine motor control, and strength to perform therapeutic activities, transfers and facilitation of movement, fine motor control to manipulate testing instruments/equipment/ writing instruments/computers.
- Manually palpate various body structures during examination and intervention procedures.
- Balance self and provide support and balance to patients on a variety of surfaces including level and uneven ground, ramps, curbs, and stairs.
- Have sufficient endurance to continue performing a variety of exertional activities for up to 8-10 hours with occasional rest breaks.
- Respond quickly to emergency situations by lifting/pushing/pulling patients, applying force to perform CPR, assist with transporting patients.
- Manipulate objects/equipment of various sizes, shapes, temperatures, smells, and textures (e.g., dials, knobs, testing instruments, therapy balls, scissors, clamps, kitchen equipment, bathroom equipment, raw foods, etc.).

SENSORY VISUAL

- Observe patients for the purposes of eliciting information; accurately describing changes in facial expression, mood, activity, and posture; and perceiving nonverbal communication.
- Ability to observe and interpret patient/client movement, or OT performance
- Observe client safety during OT performance (ADLs and IADLs).
- Observe client physical and emotional wellbeing (e.g., bruising, rashes, facial droop, autonomic changes, changes elicited by medication, etc.).
- Ability to observe equipment that monitors patient/client functions (e.g., BP, HR, respiration, pulse Oz monitors)
- Observe changes in soft tissue with the application of thermal and electrical modalities (include but not limited to orthoses, E-stim, iontophoresis, ultrasound, hot packs, cold packs etc.)
- Ability to read and view both print and online books, articles, assessment manuals, word or PDF documents, electronic medical records, graphics, email, and or video in the classroom, lab, and or clinic.
- Observe faculty and peer demonstrations in the classroom
- Observe client behavior to ensure therapist safety (e.g., aggression, frustration, changes in environment, etc.).

AUDITORY

- Ability to hear and react to alarms, emergency signals, timers, cries for help, phones, and overhead pages.
- Ability to engage in conversation.
- Ability to hear heart rate, lung sounds, and BP

OLFACTORY

- Assessment of wound and skin integrity and presence of infection
- Assessment of client hygiene and continence.
- Ability to smell safety issues with food preparation (e.g., burning food, rotting food, etc.)

TACTILE AND PROPRIOCEPTION

- Use appropriate manual pressure when touching clients.
- Perceive touch information adequately (palpation, MMT, sensory testing, mobilization, facilitation, orthoses, tone, temperature, depth, etc.).
- Perceive gradients of temperature for safe application of client applications with orthoses, bathing, and cooking activities.

VESTIBULAR

- Ability to monitor one's own position in space to maintain balance and posture.
- Ability to tolerate changes in head position during intervention.
- Ability to tolerate changes in elevation such elevators, escalators

SOCIAL EMOTIONAL APTITUDE

- Possess the emotional stability to perform in stressful or rapidly changing environments, such as an intensive academic program, a variety of clinical situations, which may involve pain, grief, death, stress, communicable diseases, blood, and body fluids, and or toxic substances, and adverse life and community experiences.
- Possess adequate endurance to tolerate physically, emotionally, and mentally taxing workloads and to function effectively under time constraints, proactively making use of available resources to help maintain both physical and mental health.

- Accept suggestions and criticisms and, if appropriate, to respond by modifying their behavior.
- Manage stress associated with completing timed written, oral, and laboratory practical exams.
- Manage modifications in the learning environment that result from unexpected situations.
- Display professionalism through appropriate presentation of oneself.
- Interact effectively with individuals, families, and groups from diverse social, emotional, cultural, and intellectual backgrounds in a variety of settings.
- Possess attributes that include compassion, empathy, altruism, integrity, honesty, caring, fairness, responsibility, concern for others, accountability, interest, tolerance, and motivation.
- Maintain general good health, self-care, and hygiene in order not to jeopardize the health and safety of self and individuals with which one interacts.
- Demonstrate the ability to be self-reflective.
- Recognize and promptly respond to emotional communications such as sadness, worry, agitation, pain, and lack of comprehension of communicated message.

COMMUNICATION SKILLS

- Computer literacy sufficient for obtaining professional literature, classroom, and clinical documentation.
- Communicate in English effectively and sensitively with peers, faculty, clinical supervisors, clients, and client families.
- Ability to produce and interpret written communication.
- Use therapeutic communication included but not limited to attending, clarifying, and coaching.
- Ability to advocate for one's role and delegate responsibilities when appropriate and collaborate within an interprofessional team.
- Listen attentively and actively to receive and interpret oral communication.

STUDENT RESPONSIBILITIES REGARDING TECHNICAL STANDARDS

- Upon offer of admission into the Programs in OT and PT at OUHSC, all students must sign a form acknowledging that they have read and understand the Technical Standards described and believe that they can meet these functions.
- If a student has concerns about meeting the Technical Standards requirements, or know they require reasonable accommodation, Oklahoma City students must contact the Student Accommodation Services (SAS) by email at Payton-Patterson@ouhsc.edu or by calling 405-271-5557, ext. 40220, and Tulsa students should contact SAS by email at Mackenzie-bedwell@ouhsc.edu or by calling 918-660-3166. Information on policies and registration may be found on the SAS website [Student Accommodation Services](#).
- Students who have a change in status at any point during their matriculation in the OT or PT program requiring accommodation must begin this process at the time of the status change.
- Due to the time it takes to properly evaluate a student's needs and to implement reasonable accommodations, it is recommended that students request accommodations as early as possible. While it is possible that the need for reasonable accommodation may arise unexpectedly, it is preferable to make a request for accommodation at least 30 days before the start of a fieldwork / clinical education course.

Individuals with disabilities (as defined by Section 504 of the Rehabilitation Act and the Americans with Disabilities Act) may be qualified to study and practice OT or PT with the use of reasonable accommodations. A student requesting accommodations to meet the technical standards will be required to provide documentation in the form of testing and/or medical opinions. After reviewing that documentation, the university may require him/her to submit to our own testing and/or medical

evaluations. To be qualified for the study of OT or PT, students must be able to meet both our academic standards and Technical Standards, with or without reasonable accommodation. Accommodation is viewed as a means of assisting students with disabilities to meet essential standards by providing them with an equal opportunity to participate in all aspects of each fieldwork/clinical education course. (Reasonable accommodation is not intended to guarantee that students will be successful in meeting the requirements of any one course or clinical education.)

The Use of Auxiliary Aids and Intermediaries

Qualified students with documented disabilities, who are provided with reasonable accommodations, may use an intermediary or an auxiliary aid. Such reasonable accommodations should be designed to help the student meet learning outcomes without eliminating essential program elements or fundamentally altering the OT or PT curriculum. No disability can be reasonably accommodated with an intermediary that provides cognitive support or substitutes for essential clinical skills, or supplements clinical and ethical judgment. Thus, accommodations cannot eliminate essential program elements or fundamentally alter the OT or PT curriculum.

ACCOMMODATIONS

REASONABLE ACCOMMODATION POLICY

The University of Oklahoma is committed to the goal of achieving equal educational opportunity and full participation for students with disabilities. Consistent with the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act of 1990, as amended, The University of Oklahoma ensures that no “qualified individual with a disability” will be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination solely on the basis of disability under any program or activity offered by The University of Oklahoma.

Accommodations on the basis of disability are available. Oklahoma City students should contact the Student Accommodation Services (SAS) by email at payton-patterson@ouhsc.edu or by calling 405-271-5557, ext. 40220, and Tulsa students should contact SAS by email at mackenzie-bedwell@ouhsc.edu or by calling 918-660-3166. Information on policies and registration may be found on the SAS website [Student Accommodation Services](#).

All students must complete fieldwork or clinical education to graduate with a professional degree from the Department of Rehabilitation Sciences. For information regarding reasonable accommodations in clinical education or fieldwork, refer to the Clinical Education and Fieldwork Handbook.

OTHER ACCOMMODATIONS

Brief illness or injury or other medical or surgical condition (expected to resolve completely in less than 1 week)

A student who develops a minor illness or sustains an injury or has an elective surgery that limits or prevents participation in coursework should immediately contact the appropriate course instructor(s), lab instructor(s) to find out how to proceed. If a student must miss lab(s), lecture(s), or mandatory events, it is the student’s responsibility to make up all work in a timely manner. Lectures are not captured for this type of absence. Absences or limited participation requirements may require a

provider's note. Lectures are not routinely captured for this type of absence and zoom links are not routinely provided for this kind of absence but will be managed per the policies of the college's Instructional Support Services and Academic Technology.

Temporary Incapacity (because of conditions that will not resolve completely within 1 week)

Students must speak with program directors **prior to** scheduling any elective procedures. A student who sustains a temporary disability due to injury, medical/surgical procedure, or prolonged illness may be unable to complete the requirements of one or more professional courses. The course instructor(s) and Program Director will discuss and decide whether it is possible to alter the level of participation in the lecture/lab over the course of the semester without sacrificing important elements of content mastery. If informal modification is not possible or not recommended, then the Program Director will outline options on a case by case basis with input from the Office of Academic and Student affairs and SAS, when appropriate, including taking a leave of absence and extending the length of the professional program.

ACADEMIC PERFORMANCE EXPECTATIONS

Students must demonstrate mastery of and competence in all didactic information and clinical skills expectations. In the Department of Rehabilitation Sciences, competence is defined as the achievement of a grade of at least C (69.5%-79.4%) or S (Satisfactory) in each program course and fieldwork or clinical education course as outlined in the syllabus, and a semester and overall cumulative Grade Point Average (GPA) of 2.500. The academic standards for The College of Allied Health must also be maintained as outlined in the [College of Allied Health Student Handbook](#).

COMPETENCE IN COURSEWORK

Didactic Courses

Unless otherwise stated in a course syllabus, the grading scale is:

- A – 89.5-100%
- B – 79.5-89.4%
- C – 69.5-79.4%
- D – 59.5-69.4%
- F – 59.4% or below

Clinical Education and Fieldwork Courses

Successful completion of each clinical education course is based on the judgment of the Academic Fieldwork Coordinator (OT) or Director(s) of Clinical Education (PT). Their judgments are based on students' successful completion of three components of clinical education:

- 1) formal and informal evaluation of the student's knowledge, skills, attitudes, and values using feedback from clinical instructors, and
- 2) satisfactory completion of all clinical assignments.

All clinical education and fieldwork courses are graded S or U.

ACADEMIC PROGRESS COMMITTEE

The Academic Progress Committee (APC) of the Department of Rehabilitation Sciences meets in person once at the end of each semester and at other times as needed to review each student's academic performance.

As outlined in the [College of Allied Health Student Handbook](#), the APC analyzes each student's overall academic performance and makes recommendations in writing to the Dean regarding each student's

academic progress. The APC may recommend that the Dean commend, promote, retain, place on or continue probation, suspend, or dismiss a student. Recommendations may also include, but are not limited to:

- Individualizing course sequence and selection
- Modifying standard timing and sequence of coursework
- Repeating courses
- Adding courses to strengthen basic competencies
- Assigning specialized academic and/or clinical projects
- Making program modifications to allow for higher-level work and advanced studies for students making exceptional progress

When a student's semester grades do not constitute required progress, that student is informed of the recommendations of the Academic Progress Committee by letter from the Dean, which includes the Dean's decision and necessary actions.

Academic Review

The Student Program Coordinator works with course instructors throughout each academic term to identify students who are having difficulty with coursework and rotations. The Student Program Coordinator works with the Program Directors to inform identified students of any deficiencies and the steps they should take going forward. Students are encouraged to contact their advisor and the course coordinator(s) to discuss their performance and strategies for improvement. When appropriate, students are referred to the Office of Academic and Student Affairs for additional support and to identify campus resources to support student success.

Students are responsible for carefully monitoring their own grades.

End of Semester Review

At the end of each semester, after final grades have been determined, the Office of Academic and Student Affairs provides a list of students failing to achieve program standards needed for good academic standing. The program's APC meets to review each student's performance and make recommendations about academic standing to the Dean of the College of Allied Health for review.

The criteria used for academic recommendations are outlined below.

PROMOTION TO NEXT SEMESTER

A student who successfully completes a full semester of the approved curriculum with both a semester and cumulative GPA of 2.500 or above, no course grades of D, U, or F, will be recommended for promotion to the next semester.

PROBATIONARY ADVANCEMENT

A student who meets one or more of the criteria to be placed on probation may still be promoted to the next semester depending on the rationale for the probationary status. Criteria for probation and subsequent actions are outlined below in the section on Probation.

GRADUATION REQUIREMENT

The APC will recommend a student for graduation if the student has successfully completed the final program semester, has no remaining required coursework, has a cumulative GPA of at least 2.500 in the professional program, and is in good academic standing.

In addition, all OT and PT students (other than those with absences due to military service as outlined in section 8.2 of the [OU Health Sciences Student Handbook](#)) are required to complete all program requirements within four (4) consecutive years unless otherwise stated by University policy. The four-year requirement begins on the first day of program coursework. A student who is unable to complete all requirements in the prescribed four-year timeframe will be recommended for dismissal from the program.

Additional information on graduation requirements can be found in the [College of Allied Health Student Handbook](#).

PROBATION

PROBATION CRITERIA

The APC will recommend probation for a student who meets one or more of the following criteria:

Semester GPA Below 2.500

Students with a semester GPA below 2.500 may be promoted to the next professional semester.

Single Grade of D or U

Students receiving probation for a single grade of D or U who do not meet the criterion for dismissal may be considered for promotion to the next semester if the academic deficiency is in a course that is not a prerequisite for subsequent coursework.

PROBATION REMOVAL

A student on probation for academic performance will be removed from probation when all academic deficiencies have been corrected.

WITHDRAWAL

The Department of Rehabilitation Sciences follows the [OUHSC policy](#) and [calendar](#) for dropping or withdrawing from courses. Withdrawing from a course may have a significant grade implication per the university policy outlined in [section 4.8.8.2](#) in the OU Health Sciences Student Handbook as follows:

Graduate and Professional students dropping one or more courses, but not all courses, in the first two weeks of class (first week of summer), will have no grade recorded. From the third week through the tenth week of class (fifth week of summer), a W will be assigned to each dropped course. From the eleventh week through the last day of classes, courses may be dropped only by direct petition to the dean of the student's college. Students who drop a course with permission of the dean will receive a final grade of W or F at the discretion of the instructor of the course.

LEAVE OF ABSENCE

The APC may recommend that a student request a Leave of Absence after earning academic deficiencies in the professional program. A Leave of Absence, for up to one year, allows a student to maintain a student status and take any missing courses or repeat course(s) with a grade of D or U during the next offering. During this time, the student will not be enrolled in any program coursework. Students are encouraged to remain in contact with their faculty advisor and program director during the leave and plan their return with guidance from the Office of Academic and Student Affairs.

It is a student's right to request a Leave of Absence for non-academic reasons at any time during the program. Students considering requesting a Leave of Absence should speak with their faculty advisor, Program Director, and the Office of Academic and Student Affairs to determine if it is in their best

interest. If approved, the student will be referred to the Office of Academic and Student Affairs to review and manage enrollment and other implications of this decision. Students who select a leave of absence are still required to complete the program within four years of their initial start date (other than those with absences due to military service).

COURSE GRADE OF INCOMPLETE

The Department of Rehabilitation Science follows policies outlined in the [OUHSC Student Handbook](#) regarding grades of “Incomplete” in coursework. If a student receives an “I” in a fieldwork or clinical course, the student will work with either the Academic Fieldwork Coordinator(s) (OT students) or Director(s) of Clinical Education (PT students) to complete the requirements for the course within a time frame that will allow the student to apply clinical education knowledge in the regularly scheduled didactic courses. All courses receiving a grade of incomplete must be completed by a deadline set by faculty course director. Any course not completed within one calendar year will receive a permanent grade of incomplete.

DISMISSAL

A student who meets one or more of the following criteria at the end of a semester will be recommended for dismissal from the program:

- A grade of F
- Two or more grades of D or U
- Failure to earn a grade of C or higher in a repeated course in which the initial grade was D or W
- Failure to earn a grade of S in a repeated course in which the initial grade was U or W
- Two consecutive semesters with a cumulative GPA of less than 2.500
- Inability to complete the program with a cumulative GPA of at least 2.500
- Inability to complete the program within four (4) years, unless otherwise allowed by University or Oklahoma State Regent policy

APPEALS

A student may appeal an academic evaluation in a course or course component, suspensions or dismissals under the policy on student professional behavior, or a program-related decisions, such as probation, repeating a semester or year, or dismissal, and are directed to review the Appendix C.1 Academic Appeals Policy and Procedures, found in the [Faculty Handbook, Appendix C](#).

PROFESSIONAL BEHAVIOR

The OT and PT program follow campus policy related to expected professional and ethical behavior clearly delineated in Appendix C.3 Student Professional Behavior in an Academic Program Policy in the [Faculty Handbook, Appendix C](#). Please review examples of unacceptable and unethical professional behavior in this document.

PREPARATION FOR FIELDWORK/CLINICAL EDUCATION

Students maintain and update immunizations, major medical health insurance, drug screens, CPR, background checks, and any other requirements and documentation throughout the curriculum. Admitted students must provide written proof of the above through the process communicated by the department's established deadline communicated on the [College of Allied Health website](#) and through direct correspondence with the department. If the paperwork is not completed and returned to the department by the established deadlines, the student is at risk for being placed on professional probation.

CONTROLLED SUBSTANCES POLICY/DRUG TESTING POLICY

The Department of Rehabilitation Sciences follows the OUHSC Drug Screening policy found in the [OUHSC Student Handbook](#).

CPR CERTIFICATION & IMMUNIZATIONS

CPR

Students must supply a copy of current certification by the **American Heart Association at the Basic Life Support for Health Care Providers** level at the time of admission to their program. We cannot accept Red Cross Certification due to the standards established for our clinical contracts. Students are responsible for keeping their certifications current while enrolled in our programs. Copies of updated cards will be uploaded by the student into the clinical education/fieldwork databases. Students cannot participate in clinical rotations unless their CPR certification is current.

IMMUNIZATIONS

The policy of the Department of Rehabilitation Sciences for immunization reflects the policy of the University of Oklahoma Health Sciences Center and the College of Allied Health. This policy protects the health of the students and meets the requirements of most of the institutions that provide fieldwork and clinical education for students. Requirements for immunizations protect students and recipients of services provided by students. More information regarding vaccines can be found on the [Allied Health Vaccine History Form](#).

OTHER DEPARTMENTAL POLICIES AND PROCEDURES

ACADEMIC MISCONDUCT

The Department of Rehabilitation Sciences follows University policy located in the [OUHSC Student Handbook](#) related to Academic Misconduct.

ADVISEMENT

Each student in the Doctor of Occupational Therapy and the Doctor of Physical Therapy programs will be assigned an academic advisor upon entering the program. Students and/or faculty may request a different advisor/advisee if the student and advisor do not match personally or professionally, or the advisement has been ineffective. If a student transfers campus, the Program Director can reassign the advisor based on feedback from the student and advisor.

For specific course related issues, the student should contact the course coordinators and/or primary instructors first. Contact information is available in each course syllabus. Students may make appointments by speaking directly with the faculty member or by e-mail during traditional working hours. Academic advisors will meet individually with each student at the start of the first fall semester and describe how they will manage their advising duties.

Academic advising is the pathway to help students succeed through insight or direction. Academic advising **is a collaborative process that includes all of the following:**

- Setting expectations, in conjunction with the Program Directors, for student participation in the advisement process including initiating appointments and coming prepared for meetings, being responsive to communication requests, and sharing the information needed for successful advisement.
- Getting to know each student on a personal and professional level to recommend appropriate supports/resources.
- Engaging with each student to foster success by encouraging short and long- term goals.
- Collaborate with students to identify study strategies that align with student strengths to support successful movement through the curriculum and to prepare for lifelong learning.
- If the student wants information on withdrawal from course/program, or leave of absences (LOAs) options, he/she/they should be referred to the program PD and Office of Academic and Student Affairs (OASA). Faculty should defer any specific discussion to OASA so that financial and academic outcomes are outlined for the student.
 - OASA will confer with the PD to determine if a modified curriculum sequence is appropriate.
- Role model interpersonal relationships and appropriate communication with faculty, students and people in the community.
- Advice on preparing for fieldwork or clinical education experiences
- Advice on preparing for career, including best paths to specialization or further education.
- Act as a liaison between the student and department/college leadership, and faculty as requested.
- Encourage and support leadership and scholarship opportunities.

ATTENDANCE

During the three years of your professional program, faculty and students work as a team to facilitate student growth as professionals. Students hold expectations for themselves, the program has expectations of our students, and your professions establish high standards for their future professionals. Professionalism is an internal benchmark that is outwardly manifested through behaviors including prompt arrival, notification of absences and limiting the number of absences, and diligent efforts to learn all content regardless of future career plans.

To support your growth, the Department of Rehabilitation Sciences expects students to arrive on time (5 minutes before class begins) and to attend at least 90% of in-person coursework across the curriculum to be successful in their program. In-person coursework includes, but is not limited to, lectures, labs, group/community settings, and special events required as part of the course. Attendance is vital to ensure that students receive the didactic and practical content needed to be a successful professional. It is therefore the student's responsibility to ensure they receive all the content and training needed for success by responsibly participating in their coursework.

Unless otherwise indicated by the instructor, "in-person" refers to class meetings held in a face-to-face setting, including utilizing distance education equipment in classrooms to connect campuses. Instructors will not routinely use video conferencing software, such as Zoom or Skype, to accommodate individual absences.

BEHAVIOR

Please see College of Allied Health Student Handbook 2023-2024 in section 6.2

Students must adhere to professional standards in classrooms, laboratories, clinics, and community settings. Students are responsible for using, cleaning, and storing all equipment as directed by the course and/or lab instructor in a manner that ensures the health and safety of themselves, patients/clients, other students, and faculty. Failure to appropriately use equipment and supplies may result in discipline.

CAMPUS TRANSFER POLICY

Students are offered enrollment on a specific campus and are expected to attend classes/labs/other events on that campus for the entire three-year program, regardless of changes in their personal circumstances. The faculty will consider any transfer requests for the 4th semester under *very extenuating circumstances*, but it is more likely that transfers will not occur until the student's 7th semester in the program. Students wishing to request a transfer to the opposite campus must follow the policy outlined below:

1. Contact the Office of Academic and Student Affairs to request a transfer and provide a reason for the request. The date on the email will determine the student's position on the waiting list. Students must send the email message 'read receipt requested' and keep a copy of both the read receipt and their sent message.
2. The program directors will discuss the request with the Office of Academic and Student Affairs and make a decision. Due to issues involved, it may not be possible to decide prior to the start of a semester, and transfers are not allowed during the semester. The request will be reviewed considering (1) whether a vacancy exists within the original class size of the campus to which the student is requesting a transfer and (2) the faculty-student ratio on each campus and (3) the program director's assessment of the impact of the transfer. A mid-semester vacancy on one campus does not guarantee that the faculty-student ratio will automatically allow a transfer at the end of the semester.

The program director will assign an advisor on the new campus to the transferred student. At times, a student will ask for special permission to attend a day of classes on the opposite campus for personal convenience. Make these requests in advance directly to the course coordinator/instructors and are usually approved for lecture sessions or professional development activities. Requests related to lab attendance are discouraged and students should expect to attend all labs on their home campus.

CONCERNS AND COMPLAINTS

APPLICANTS

Program applicants should address any concerns or complaints to the [Office of Academic & Student Services](#). As needed the office will involve the department chair and/or program directors.

ENROLLED STUDENTS

Communication regarding concerns may vary depending on the situation. In general, the following procedures should be followed:

- a. If the issues are personal in nature, the student should contact the advisor.
- b. If the issues are classroom/course content-related, and applies to the entire class, the student should contact the Class Leadership. The Leadership will communicate to the course instructor on behalf of the class. The next step of communication is to report to the Program Director.

- c. If the course/content issue applies only to the student, the student should contact the course coordinator/instructor directly.

OUTSIDE ENTITIES

Any complaints received from non-student sources will be passed to the department chair by the informed person. The chair will address the concerns when received, involving the Office of Academic and Student Affairs as appropriate to determine the best path forward. Confidential documentation of any non-student complaints is kept and shared with the Office of Academic and Student Affairs to ensure that the proper chain of command is sustained.

CIVIL RIGHTS COMPLAINTS

All complaints regarding a violation of someone's civil rights should be referred to the [Institutional Equity Office](#).

OT ACCREDITATION (ACOTE) COMPLAINTS: PROCESS FOR FILING A COMPLAINT

ACOTE has a mechanism to consider formal complaints about occupational therapy education programs. The full policy is located on the [ACOTE Website](#). This policy includes documentation that the complainant must have made reasonable efforts to resolve the complaint, or alternatively information that demonstrates such efforts would be unavailing through the institution's policy. The OUHSC College of Allied Health, Department of Rehabilitation Sciences Academic Program's Complaint Grievance Policy follows:

- a. Student must meet with faculty course coordinators and discuss the perceived issue.
 - b. If the faculty coordinators cannot address the issue or develop a plan to address the issue in an acceptable timeframe, then the students must meet with the OT program director and Chair to outline the perceived issue.
 - c. If the OT program director and Chair cannot address the issue or develop a plan to address the issue in an acceptable timeframe, the student must meet with the Dean of the College or the Dean's designated representative, the Assistant Dean of Student Services.
 - d. If the situation is not adequately addressed at this point, students are referred to the OUHSC Vice President for Academic Affairs to address the issue or develop a plan to address the issue in an acceptable timeframe.
 - e. In the event none of the above steps result in a successful outcome the student may submit a complaint to ACOTE.
2. The complaint must be submitted in writing, using the format prescribed by ACOTE.

PT ACCREDITATION (CAPTE) COMPLAINTS: PROCESS FOR FILING A COMPLAINT

CAPTE has a mechanism to consider formal complaints about physical therapy education programs that allege a program is not in compliance with one or more of CAPTE's [Evaluative Criteria](#) or has violated any of CAPTE's expectations related to academic integrity. CAPTE will consider two types of complaints: those that involve situations subject to institutional due process policies and procedures and those that involve situations not subject to due process procedures.

- If the complainant is involved with an institution/program grievance subject to due process and procedure, CAPTE requires that the process be completed prior to initiating CAPTE's formal complaint process, unless the complaint includes an allegation that the institution/program

process has not been handled in a timely manner as defined in the institution/program policy, in which case CAPTE will consider the complaint prior to completion of the grievance process. Evidence of completion of the institutional process or of the untimely handling of such must be included in the complaint materials.

- If the complaint is related to situations that fall outside of due process policies and procedures, the complaint may be filed at any time.

For CAPTE to consider a formal complaint, several conditions must be met:

3. The complaint must be specifically linked to the relevant PT Evaluative Criteria or to the integrity statements.
4. The complainant must have exhausted all remedies available through the institution, if appropriate. Each step of the process is allotted ten business days, with the possibility that more time might be needed at any step, depending on circumstances. At OUHSC College of Allied Health, Department of Rehabilitation Sciences, “exhaustion” is achieved through the following steps:
 - a. Students must meet with faculty coordinators who are assigned to their cohort and discuss the perceived issue.
 - b. If the faculty coordinators cannot address the issue or develop a plan to address the issue in an acceptable timeframe, then the students must meet with the PT program director and Chair to outline the perceived issue.
 - c. If the PT program director and Chair cannot address the issue or develop a plan to address the issue in an acceptable timeframe, the student must meet with the Dean of the College or the Dean’s designated representative, the Assistant Dean of Student Services.
 - d. If the situation is not adequately addressed at this point, students are referred to the OUHSC Vice President for Academic Affairs to address the issue or develop a plan to address the issue in an acceptable timeframe.
 - e. In the event none of the above steps result in a successful outcome the student may submit a complaint to CAPTE.
5. The complaint must be submitted in writing, using the format prescribed by CAPTE, and must be signed by the complainant.
6. The event(s) being complained about must have occurred at least in part within three (3) years of the date the complaint is filed.

In reviewing and acting on a complaint, CAPTE cannot and does not function as an arbiter between the complaint and the institution. Should CAPTE find that a complaint has merit and that the program is out of compliance with the Evaluative Criteria or the integrity statement(s), CAPTE can only require the program to come into compliance with the Evaluative Criteria. CAPTE cannot force a program into any specific resolution of the situation that resulted in the complaint. **To obtain the materials necessary for submitting a complaint, contact the APTA Accreditation Department at 703/706-3245 or at accreditation@apta.org.** CAPTE will **NOT** consider complaints that fall outside its jurisdiction/authority as expressed in the Evaluative Criteria and the academic integrity statements. When appropriate, complainants will be referred to other organizations to pursue their concern(s).

COURSE MATERIALS

Course materials include required books, online documents, media materials, and study materials. If a student receives any materials, including study guides, from previous student cohorts, it is the students' responsibility to make certain that the use of these materials is authorized by the instructor of the course.

Each cohort may set up a Google Drive to share currently authorized course materials with other members of the cohort. The cohort must have a formally elected student to act as the administrator of the depository and indicate this student to the faculty. No course material should be included in the depository without explicit consent of the faculty, who may request to review the content at any time. Any shared content that has not been explicitly approved for dissemination by the instructor to any individual is considered unauthorized material and will be subject to academic misconduct policy.

CANVAS AND DESIRE2LEARN (D2L)

Desire to Learn (D2L) is a web-based course-management system designed to allow students and faculty to participate in classes delivered online or use online materials and activities. The degree to which instructors use D2L in a course will vary. Access the D2Llogin page by using the following link:

<https://learn.ouhsc.edu/d2l/loginh/> If you have questions about D2L, contact a member of the [Instructional Support Services staff](#).

CANVAS

Canvas is a web-based course-management system designed to allow students and faculty to participate in classes delivered online or use online materials and activities. The degree to which instructors use Canvas in a course will vary. The College of Allied Health will begin using Canvas in the Fall 2023 semester. More information about accessing Canvas to come prior to the beginning of the semester.

DRESS CODE

For all:

At the University of Oklahoma, we hope all students feel comfortable expressing themselves in their personal style choices. We value diversity and strive to create an inclusive environment that respects individuality and promotes equality for all.

Professional Dress:

Professional dress is aligned with the profession one is training for or working within and is typically defined with pieces of clothing such as: collared shirts, ties, blouses, blazers, suit jackets, sweaters, slacks, dresses/skirts, and dress shoes.

Business Casual:

Business casual attire is typically more relaxed than professional dress but maintains the look of a professional working in their respective environment with clothing items such as: khaki pants, dress shirts or blouses, skirts or dresses, and closed-toe shoes.

Tips:

Clothing that is tight, short, or revealing could impact your mobility to participate in all orientation activities. Casual items like t-shirts and sneakers are best suited for other connection opportunities.

For professions that utilize a white coat, please note a white coat can be considered professional dress unless directed otherwise.

Not all health care environments allow for open-toe shoes, please check-in with your college student services team or HSC & OU-Tulsa Student Affairs for helpful direction on dress code questions.

Students must adhere to normally accepted standards for hygiene and personal cleanliness in all environments and dress appropriately for students aspiring to their profession. Dress for laboratory settings or skills examinations must adhere to the standards outlined in the syllabus for each course. Students are also referred to the [College of Allied Health Student Handbook](#) section on professional dress code.

Students in the Department of Rehabilitation Sciences are required to have name tags provided by the department to wear to all lab sessions, lab practical exams, and during all clinical rotations. Students are responsible for notifying the DRS Student Program Coordinator of any lost tags or name changes that require a new name tag as soon as possible. Additional name tags are routinely ordered, but students are responsible for paying for additional name tags after their first one.

General Guidelines for Clinical Courses:

[Please see College of Allied Health Student Handbook 2023-2024 in section 6.1.1](#)

Students should follow dress code specified by each clinical facility. Dress codes vary from scrubs, uniforms, casual attire, or more formal attired (including ties for men). It is the student's responsibility to ascertain proper dress code prior to participating in the clinic. Proper attire will consist of clothing that covers chest, stomach, back and hip/buttock areas, suitable shoe wear (no open-toe shoes), socks or hosiery, and OUHSC nametag. Cologne, cosmetics, and jewelry should be conservative and kept to a minimum. Jewelry should be limited to close-fitting post earrings, watches, and simple rings. Visible body piercings, such as eyebrow, nose, or tongue rings, are not acceptable. Visible tattoos should be covered. Fingernails should be trimmed and clean.

ELECTRONIC DEVICES

The College of Allied Health and the Department of Rehabilitation Sciences require all students to have their own laptop computers with Internet access during all three years in the program. The College of Allied Health has specific computer requirements that ensure compatibility with computer resources of the College which can be viewed in the [College of Allied Health Student Handbook](#).

ELECTRONIC MEDIA

The Department encourages students to activate the most stringent privacy settings on their social media accounts and to make good decisions concerning the impressions they portray through their postings on these sites. Class Facebook pages are permitted, although not officially sanctioned by the program or University, but students are held accountable under the honor code and other standards for content posted or commented on by them. Refer to the College of Allied Health Student Handbook section on [Professional Performance and Behavior](#) and the [OUHSC Professional Behavior in an Academic Program policy](#) for more details.

Students shall not post or forward photos, comments, or other forms of course-related material, including clinical education and fieldwork courses, referring to OUHSC faculty, adjuncts, students, patients/clients, or clinical personnel to web-based social media sites.

EXAMINATION POLICY

The Department of Rehabilitation Science institutes policy to ensure professionalism and ensure that the student registered in the program participates in and completes the program. Security measures include but are not limited to: verification of enrollment each semester through a self-service portal. After a two-point verification process to access the self-service portal, students must provide their ID, email, user name and password. Additionally strict examination processes are in place as follows:

In Person Examinations

All courses will employ a strict policy for delivering examinations. Examinations are proctored by on site faculty or approved room monitors trained in the examination process. Cell phones, smart watches, and computers (unless it is an on-line exam) must be turned off and placed in backpacks that the students will put at the front or back of the classroom. Unless instructed differently, students should have nothing with them at their desks except the examination, their computers for on-line exams or a scantron sheet, and one or two pencils. Students may not wear hats unless it is a religious or cultural head covering. Proctors will strictly enforce these procedures. If a student arrives late to the exam, extra time will not be given for the completion of the exam. Even if time remains on the student's computer clock for electronic exams, students will not be given extra time.

After each student completes and clicks the submit button for their exam, but before exiting out of Lock-down Browser or turning your computer off, take your computer to the exam proctor. Show the proctor that you are exiting the exam and Lock-down Browser. Please, do this one student at a time. Finally, before leaving the classroom, make sure you sign the sign-out sheet.

Students should view this policy as a means of ensuring that everyone in the class has the same opportunity to demonstrate their knowledge of the subject matter on the exam and that no one has an undue/unfair/unethical advantage.

If allegations are made allege that cheating has occurred, the Department will follow the University Academic Misconduct policy mentioned previously.

Examinations Taken in a Virtual Environment Using Web-Based Platforms

Online examinations will be delivered through virtual platforms using the student's own computer with Respondus lockdown browser. The Respondus monitor includes a camera feature that records students during online exams. Students are required to use a webcam and microphone with lockdown browser in this online testing environment. Instructors can then review a report with recorded details of the examination. All students are required to maintain an up-to-date computer and the academic technology team, given enough advanced notice, can assist you.

Students should view this policy as a means of ensuring that everyone in the class has the same opportunity to demonstrate their knowledge of the subject matter on the exam and that no one has an undue/unfair/unethical advantage. If allegations are made that cheating has occurred, the Department will follow the University Academic Misconduct policy mentioned in a previous section.

HIPAA

The Department of Rehabilitation Science follows the [University policies](#) regarding HIPAA. In addition, students shall not post or forward photos, comments, or other forms of material that mention, depict, or are related to patients in any form. Students should be especially careful to avoid discussing any information protected by the Health Insurance Portability and Accountability Act (HIPAA). Any student

found to have posted, supplied, or forwarded copyrighted or protected materials for postings on web-based communication shall be subject to disciplinary action.

LABORATORY (LAB) EXPERIENCES, LAB SPACES, AND LAB EQUIPMENT

Many courses that have skills-based components will have laboratory experiences associated with them. In many of these experiences, students will assume the roles of practitioner and patient as well as other possible roles they will encounter in future practice. The safety of students when in any of these roles, particularly that of patient, is of utmost importance. As such, the program and its faculty/lab instructors aim to promote an optimally safe environment. Students will have access to laboratory spaces at all times (during and after regular hours, including weekends) to practice skills learned in class and lab, which are accessible by use of their swipe cards. Maintenance of lab equipment – including calibration and safety checks – occurs annually. Each piece of equipment is labeled with an inspection sticker that lists the last date of inspection and maintenance. Lab equipment must remain in the lab unless special arrangements are made in advance with the course instructor or the program director. Students are held responsible for damage to lab equipment when the damage occurs because of the student's failure to follow instructions (written or oral) about maintenance, and/or safe operation of equipment.

MANDATORY PROFESSIONAL DEVELOPMENT

To promote life-long learning and professional development, the Department creates many learning opportunities that involve bringing nationally and internationally known speakers to our campuses. Students will attend and participate in these professional development activities. All year 1 and year 2 students on both campuses must attend several annual events.

Year 3 students will typically attend these events as their schedule allows unless notified by faculty of any required attendance.

Students who fail to attend and/or sign in as directed for these mandatory events are considered absent and will face academic and/or professional behavior consequences. Absences are unauthorized unless evaluated in advance by the program directors.

VIRTUAL ENVIRONMENT INTERACTIONS

Students must adhere to the Code of Ethics and DRS professional standards for attire and language while on virtual environment platforms for class or meetings. Students should be respectful of each other. Students should make every effort to attend virtual classes and meetings in an environment that is comparable to the classroom, for example sitting at a desk or a table. All postings on any virtual environment chat feature (whether private or public) must relate to the course content. Students must send personal or non-course related postings on their private communication devices and only post/read these personal postings before class, after class, or during breaks. Communications sent to classmates on personal communication devices must also adhere to the DRS professional standards as outlined in the handbook.

SAFETY INFORMATION AND RESOURCES

CAMPUS SAFETY

FIRE & BUILDING EVACUATION

OKC: In the event of a fire, activate the nearest fire alarm pull station. **Call OUHSCPD at 405-271-4911.** Notify occupants and help those needing assistance in the immediate areas. When the fire alarm is activated, evacuation of the AHB is mandatory. Take all personal belongings (keys, purses, wallets).

Close doors as you exit. Evacuate the building at the nearest exit. Do not use elevators. Proceed to the southeast corner of Parking Lot 'L', immediately behind (to the East) the Allied Health Building. Do not re-enter the building until authorized to do so by emergency personnel.

OU-TULSA: In the event of a fire, follow the instructions provided for fire notification and evacuation specific to the building in which you are occupying. Activate the nearest fire alarm pull station. **Call OU-Tulsa Campus Security at 918-660-3333.** Notify occupants and help those needing assistance in the immediate areas. Make your way from the nearest exit, closing doors as you go and proceed to the designated meeting area for the respective building for further instructions.

ACTIVE SHOOTERS

If possible, exit the building immediately and call

**OUHSCPD at 405-271-4911 or
OU-Tulsa Campus Security at 918-660-3333.**

If you cannot exit: Clear the hallway immediately and/or remain behind closed doors in a locked or barricaded room, if possible. Stay away from windows. Remain calm and quietly call

**OUHSCPD at 405-271-4911 or if on the
OU-Tulsa campus call Campus Security at 918-660-3333.**

Students should evacuate the room only when authorities have arrived and instructed them to do so, and not leave the room or unlock the door to see "what is happening." Students should not attempt to confront or apprehend the shooter, unless as a last resort. Students should place the call as need without assuming someone else has called police or emergency personnel.

EMERGENCY RESOURCES

OKC THREATS: Threat Assessment Review Committee (TARC) is an interdisciplinary committee that consists of team members with law enforcement, student affairs, mental health, communications, legal and human resources experience and expertise. This committee monitors and addresses threats or potential threats that may pose safety issues on the HSC campus. To report a concern to TARC/handle an activity which:

1. *appears to be an immediate threat to yourself or others by calling*
 - a. HSC Campus Police Dept. (405) 271-4911
 - b. If you call on campus using a cell phone and an operator asks, "What city," request OUHSC PD.
2. *concerns you, but that you do not see as an immediate threat to yourself or others by calling***
 - a. Executive Director for HSC Student Affairs: (405) 271-2416
 - b. Vice President for Student Affairs: (405)325-3161

****If time permits and you are uncertain as to the urgency of the situation, you can discuss the issue with your program director, faculty, or CAH Student Services Department prior to contacting TARC.**

TULSA THREATS: Threat Assessment Review Committee (TARC) is an interdisciplinary committee that consists of team members with law enforcement, student affairs, mental health, communications, legal and human resources experience and expertise. This committee monitors and addresses threats or

potential threats that may pose safety issues on the Tulsa campus. To report a concern to TARC: Handle an activity which:

1. *appears to be an immediate threat to yourself or others by calling*
 - a. OU-Tulsa Campus Police Dept. (918)660-3333.
 - b. If you call on campus using a cell phone and an operator asks, "What city," request OU-Tulsa PD.
2. *concerns you, but that you do not see as an immediate threat to yourself or others by calling*
 - c. Executive Director for OU-Tulsa Student Affairs: (918)660-3107

See http://www.ou.edu/tulsa/current_students.html for general info for students about BIT, TARC, and OU Tulsa PD.

More information regarding OUHSC Emergency Response can be found in the [OUHSC Emergency Operations Plan](#).

HAZARDOUS MATERIALS

Occupational Safety and Health Administration (OSHA) regulations apply only to paid employees. However, students are expected to follow the precautions outlined by those regulations to ensure a safe and healthy working environment. Environmental Protection Agency (EPA) regulations addressing management of hazardous materials applies to all individuals on the OU Campus. Health and safety precautions and procedures established by individual departments or laboratories must therefore be always followed by students. For a summary of the safety and health requirements at OU, visit the [EHSO General Student Guidelines website](#) or the [EHSO Manual, section 9](#).

WEATHER:

In inclement weather, decisions related to campus closure are made by University Administration and communicated electronically to each campus. Regardless of what information may be posted on the local weather channel sites, rely on the information posted on the official website for your campus.

Rehabilitation Sciences-Two Campus Inclement Weather Policy

Occasionally inclement weather will necessitate campus closure as dictated by the OUHSC Provost and OU-Tulsa President. If inclement weather is predicted, please check your campus websites to ascertain the status of your campus. Students should also receive notification from Emergency Communication Systems via text, phone, and email. Students are expected to monitor these sites to determine if classes are to be held. Failure to do so may not be accepted as an excuse for a missed exam or assignment. Because we have two separate campuses, we have guidelines in the event one campus is open, and one is closed:

Lectures:

- *If the campus from which the lecture originates is closed (i.e., the faculty coordinator is from that campus), regardless of whether online lecture delivery is specifically mentioned, class will not be held.*
- *It is within the purview of the faculty on the closed campus to record a voice-over PowerPoint and upload for students on either campus to view. While viewing on the day that the campus is closed is not mandatory, students are expected to know and understand the content sufficiently to pass later scheduled examinations.*

- *If the campus from which the lecture originates is open, students on the open campus will be required to attend in person or virtually (depending on the syllabus instructions and the course attendance policy).*

Students on the closed campus will be given access to a video of the lecture for that date.

Labs:

- Labs will not be held on the closed campus.
- Lab may or may not be held on the open campus by discretion of the instructor.
- Labs may be live streamed from the open campus for the closed campus to watch as desired in real time or viewed later via zoom recording.
- It is the discretion of the faculty as to whether a make-up lab is needed.
- Make-up labs may be held on alternate times and dates to ensure the content is delivered.

Clinics:

- Class cancellation does not apply to clinical rotations/fieldwork. Students should call in to the clinic and/or their clinical instructor to assure whether the clinic is open, and whether the student is expected to report for clinic duty.

Tests:

- If in person or online tests are being administered and either campus is closed, the test will be rescheduled, and class will not be held.
- It is at the discretion of the course coordinator whether in person, or online lab checkouts (such as Clinical Reasoning Assessments) will continue on an open campus when the other campus is closed. Course coordinators will communicate that information to their students via e-mail. Any checkouts for students on the closed campus will be rescheduled for a later time.

SEXUAL HARASSMENT, GENDER DISCRIMINATION, AND/OR OTHER INEQUITY ISSUES

The Department of Rehabilitation Sciences follows [OUHSC's University Sexual Misconduct, Discrimination, and Harassment Policy](#), in regards to both the personal conduct of students, staff, and faculty and the reporting of any possible complaints of conduct.

Students are directed to the [Institutional Equity and Title IX Office website](#) for the full policy and definitions.

For complaints concerning actions governed by this policy, students should find the appropriate contact person on the following website links:

OU CAMPUS RESOURCE LINKS

- [Student Forms, Handbooks, & Policies](#)
- [Campus Student Services](#)
- [Student Wellbeing](#)
- [OU Veteran Resources](#)
 - [OU Green Zone](#)

FIELDWORK AND CLINICAL EDUCATION GUIDELINES

OVERVIEW

The occupational therapy profession refers to academic experiences in clinic and community settings as “fieldwork” and the physical therapy profession refers to these experiences as “clinical education”. We use both terms to refer to each profession’s experiences. The fieldwork and clinical education programs of the Department of Rehabilitation Science exist within the academic programs in occupational therapy and physical therapy to allow students enrolled in course work to apply knowledge and skills acquired in the classroom and laboratory to the practice environment. The Academic Fieldwork Coordinator (AFWC) and the Director of Clinical Education (DCE) provide the guidelines, as students prepare for these experiences. These guidelines are contained in the respective handbooks for fieldwork and clinical education.
